RENEWABLE
ENERGY

CHARGES
ALL CARS

An Engenie rapid charging station delivers a premium customer service that is cost and hassle-free for the site owner.

Our UK-wide network is open-access with no membership required, no connection fee and simple contactless payment, a 24/7 helpline, and a straightforward per-kWh tariff.

I have switched shopping from Tesco to Sainsbury's just because of this revolutionary charger.

Engenie Customer

It's not only beneficial to the environment, but also another great improvement to boost our local economy.

Councillor, Hart District Council

What are the benefits of partnering with Engenie to offer electric vehicle rapid charging?

100% funded: equipment, installation & maintenance

- All groundworks and grid connection costs provided free
- All equipment, installation and ongoing operation provided at no cost to council
- Space-efficient: 1 rapid charger does the job of 10 slower chargers
- 24-hr fully managed service with pro-active monitoring and customer support line
- Highly reliable chargers (2-4 per site)

Attract visitors to the area

- Can be in car parks or on street
- Increase visitor dwell time
- Support local businesses and the whole community
- Gain visibility online via EV charging maps and in-car GPS
- Attract the fast-growing population of EV drivers
- Easy-to-use, contactless payment
- Regular, detailed reporting
- No subscription fee or membership

Go low-emission

- Improve local air quality by reducing particulates and NO_x
- Contribute to CO₂ and pollution emission reduction
- Detailed charging reports, showing CO₂ saved and EV usage
- Directly encourage EV uptake
- Support renewable energy: 100% electricity from renewable sources

Long-term regular revenue stream

- Council receives an ongoing, long-term income up to £100,000 over lease term
- Chargers compatible with all current and future EVs
- Future infrastructure and software upgrades for free
- Long-term stability and security via institutional financial backing
